About Me

I am Seble H/Mariam, a Software Engineering graduate who specializes in full stack development. I design and implement comprehensive software solutions, guiding projects from initial concept through to deployment and maintenance.

WORK EXPERIENCE

Frontend Developer Intern
Perago Software Solutions —Addis Abeba, Ethiopia
July 2023 – September 2023

- Developed a hierarchical employee position/role registration system, displaying data in a tree view.
- Utilized technologies such as Angular, Ant Design, and Tailwind CSS.

Frontend Developer Intern
Kachamele Technologies — Addis Ababa, Ethiopia
July 2024 – September 2024

- Contributed to frontend development using Next.js to create a website.
- Developed a dynamic portfolio website to enhance user experience and functionality.

Graduation Project: "Lwie"
A web-based platform designed for swapping and trading items among users. I was involved in both frontend and backend development, utilizing Next.js, Tailwind CSS, PostgreSQL, and Node.js with Express.js to create a seamless user experience and robust functionality.
